Soft-focus effect
Natural tan
Sunkissed glow*

GO SUSTAINABLE!

Indie Collection
SUBLIME MY SKIN

Thanks to the action of **EMotion Light**, the new ester horizon coming from renewable resources, the formula is dressed by a safe profile not only for nature but also for people. However, it is not enough, as for maximizing the yield of sustainability: **Celus Bi® Feel**, the ethical alternative to standard powders, enriches the formulation with multiple functions (texturizing, formula touch & stability, soft focus and many others). In a world constantly evolving through a more eco-friendly approach, do not risk falling behind and making a step ahead in the sustainability context.
