*Microbiota protection  
Prevention treatment  
Hydration  
Fresh tone*

*GO SUSTAINABLE!*

# Indie Collection

## WAKE UP SKIN

A fresh formula designed to protect and rebalance your skin microenvironment, thanks to the presence of **ÆCTive®**.

The ingredient is the innovation to effectively protect each person's unique and varied microbiota. Tested in-vivo efficacy in ameliorating the discomforts affecting acne-prone skin and in restoring skin microbiota after pollution aggressions.

Efficacy is also linked to the sustainable approach derived from the presence of **CytoFruit® Waters**, 100% biologically active waters, from Mediterranean fruits helping to save demineralized water content and rich in phytonutrients, naturally present in fruits.
